ATTENTION!

BEFORE STARTING THE ASSEMBLY PROCESS:

-CERTAINLY CHECK THE LAYOUT BEFORE CEMENT SILO ASSEMBLY!

- FOR ELKON PARTIAL CEMENT SILO ASSEMBLY, YOU MUST CARRY THE PACKAGED SHIPPED PARTS TO A NEARBY AREA TO BE ASSEMBLED. MAKE SURE THAT THE AREA IS DRY, FLAT AND CLEAN.

-FILLING PIPES OF THE CEMENTO CYLINDERS MUST BE ASSEMBLED IN ACCORDANCE WITH THE LAYOUT PLAN. OTHERWISE, THE CYLINDERS WILL BE FILLED WITH SILOBASE DURING THE USE OF THE POWER PLANT.

-THE INTERCONNECTION TYPE ON ONE SIDE OF THE CEMENTO SILO LEGS IS DIFFERENT. SPIRAL PASSES THROUGH THE DIFFERENT SIDE. FOOT ASSEMBLY SHOULD BE ASSEMBLED ON THE INLET SIDE OF THE SPIRAL, IN ACCORDANCE WITH THE PLACEMENT.

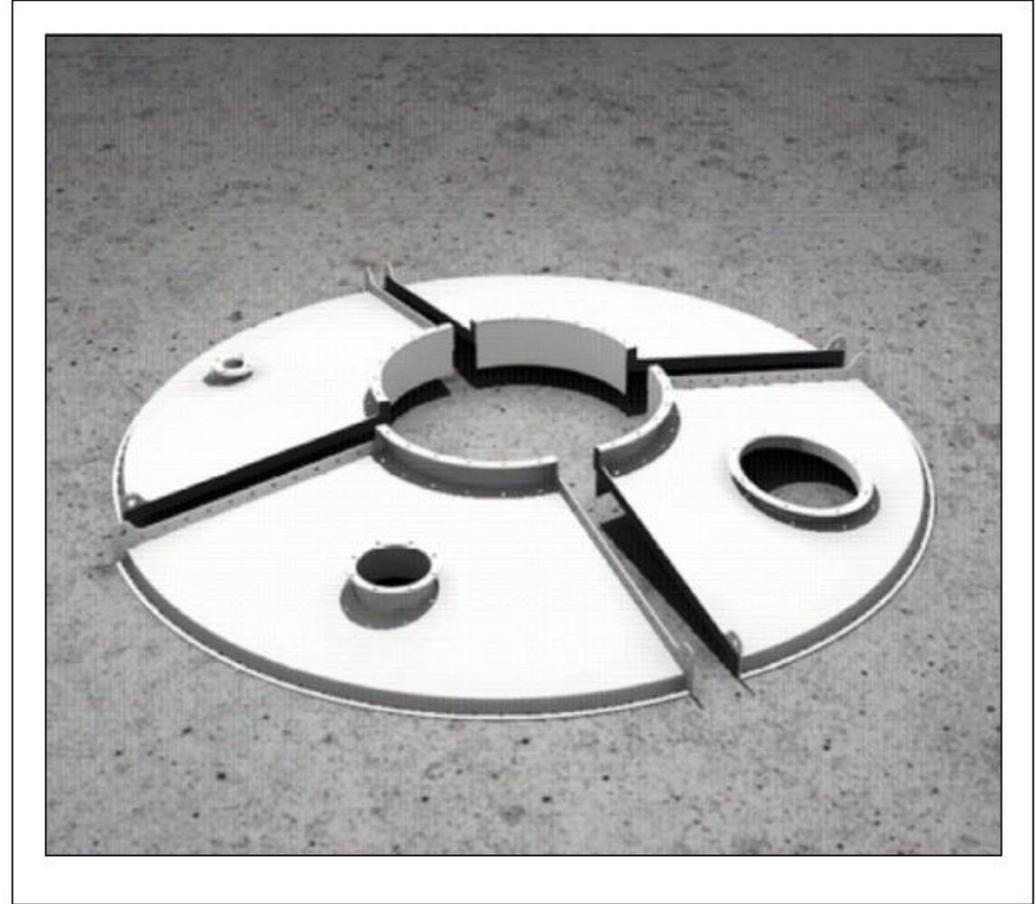

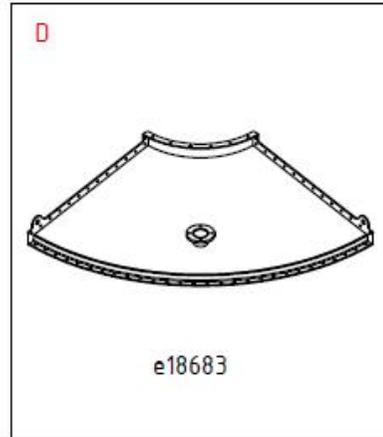

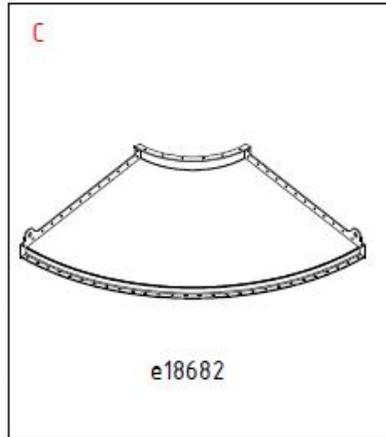

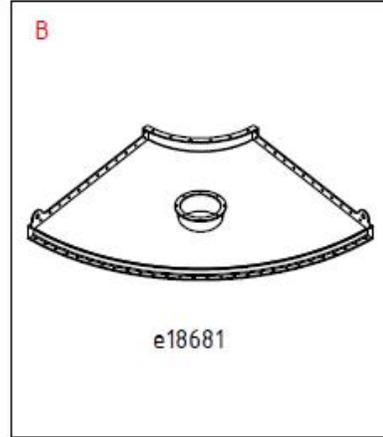

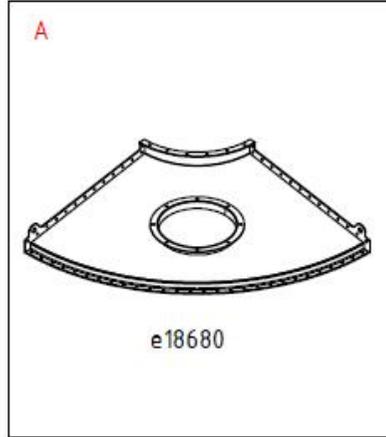

-BEFORE THE INSTALLATION OF THE CEMENT CYLINDER RAILING, A SINGLE RAILING IS PASSED THROUGH THE FILLING PIPE IN THE CEMENT SCREED. THIS DETAIL WILL ENSURE A COMFORTABLE INSTALLATION WHILE INSTALLING THE RAILING. (SEE PAGE 37)

-SINCE THE REINFORCEMENTS HAVE DIFFERENT THICKNESSES, THE THICKNESSES ON THE REINFORCEMENTS SPECIFIED. ASSEMBLE THE HARDWARE PARTS IN ACCORDANCE WITH THE VISUALS GIVEN TO YOU.

ATTENTION!

- THE AREA WHERE THE WORK WILL BE CARRIED OUT MUST BE SURROUNDED BY CONCRETE MEASURES BY KEEPING A SUFFICIENT SAFE DISTANCE AND UNAUTHORIZED PERSONS MUST BE PREVENTED FROM ENTERING.
- IS THE WORK AREA SECURED?
- IS THE AREA SURROUNDED?
- WARNING SIGNS POSITIONED?
- IF NECESSARY, HAS THE ENERGY BEEN CUT OFF AND LABELING / LOCKING BEEN DONE?
- IS THE WORK EQUIPMENT/EQUIPMENT TO BE USED SUITABLE?
- HAS THE WORK EQUIPMENT TO BE USED BEEN CHECKED?
- SECURE DESCENT AND ASCENT MUST BE PROVIDED TO THE WORKING PLACES AT HEIGHT, AND DESCENT AND ASCENT MUST NOT BE MADE FROM UNSAFE AND PRECAUTIONARY PLACES.
- THE AREA WHERE THE WORK IS CARRIED OUT MUST BE SURROUNDED BY CONCRETE MEASURES BY KEEPING A SUFFICIENT SAFE DISTANCE, AND UNAUTHORIZED PERSONS MUST BE PREVENTED FROM ENTERING.
- WORK EQUIPMENT USED MUST NOT BE CLIMBED OVER THE RAILINGS AND MUST NOT PASS OUTSIDE THE RAILING AREA.

As shown in A, B, C and D, partial visuals of cement silo hats are given. As shown in the other image, the cement silo hats are turned into a ring. Black gasket-tape is drawn between the hats, bolts are attached and the bolts are tightened. The hats are attached to each other. M12x35 bolt is used. The hats of 30-50-75-90-100-125 and 150 tons cement silos are common.

30 – 50 – 75 – 90 -100 – 125 VE 150 TON CEMENT SILO COMMON ASSEMBLY MANUAL

30 – 50 – 75 – 90 -100 – 125 VE 150 TON CEMENT SILO COMMON ASSEMBLY MANUAL

The next step after the assembly of the cement silo hat is to ring the reinforcement consisting of four pieces as shown and use silicone sealant for sealing the joints before assembling each other. Make sure to do this for all reinforcement. M14X40 bolts are used when joining all reinforcements together.

30 – 50 – 75 – 90 -100 – 125 VE 150 TON CEMENT SILO COMMON ASSEMBLY MANUAL

As shown in the visual, the blue colored fragmented silo reinforcements of the cement silo with Elkon inscription are turned into a ring. These reinforcements are 4 pieces. Then black gasket-tape is inserted between the reinforcements and the bolts of the reinforcements are threaded and the bolts are tightened.
